CISSP Weekly Plan

Trainer and Student Use

NCSC Accredited Certified Information Systems Security Professional (CISSP)

Weekly plan for all the topics covered within the CISSP course

Michael Dieroff – Chief Executive Officer – CISSP

Overview

This course is designed to provide the student with all the knowledge they require to gain the CISSP qualification. Candidates will be exposed to all 8 of the CISSP security domains and cover each of the domains in depth. Most organisations now understand that technology alone cannot secure their data and are seeking seasoned professionals who can create an implement a comprehensive information security program. Earning your CISSP is a deserving achievement and makes you a member of elite network of professionals.

Course Materials:

All delegates are provided with highly recommended courseware. Other resources will be provided like official technical drafts, white-papers and case studies. All students are furnished with materials like note pads, pens, highlighters and other necessary stationary. Many other study aids are provided throughout the course ensuring each student a unique learning experience.

Certification:

Exam: The CISSP was the first credential in the field of information security to meet the stringent requirements of ISO/IEC Standard 17024. CISSP certification is not only an objective measure of excellence, but an also globally recognized standard of achievement.

Prerequisites:

Candidates require an excellent working knowledge of networks and security devices and procedures. A CompTIA Network+ and CompTIA Security+ qualifications are desirable. You will be required to prove 5 years' experience in at least one of the CISSP CBK's.
